BI / XML Publisher

Is your organization looking for ways to save money and simplify your ERP footprint? Many organizations have multiple reporting tools for all types of reporting and publishing needs. Since 2003, Oracle has provided e-Business Suite users with Business Intelligence Publisher (formerly XML Publisher) free as part of the 11.5.10 e-bus suite. It allows for data from anywhere to be converted through Oracle BI Publisher to be delivered anywhere and in virtually any format. These formats include specialty output like: checks, financial statements, shipping labels, contracts, purchase orders, dunning letters, government forms, and operational reports to name a few. It has enabled organizations to eliminate 3rd party printing and publication products allowing for the reduction of licensing costs, hard-to-find consultants, and support costs while simplifying their operations.

Description of Services: O2Works, with some of the most experienced, hands-on consultants, provides three unique offerings to help get your organization get more value from your e-business suite investment. Two of the offerings are quick jumpstart workshops (one for technical developers and one for functional / business analysts) designed to give you the basics and get you on your way. The third offering is an overall assessment of all your reporting and publishing requirements and development of a comprehensive plan to convert you to the open source standards of the future.

Jumpstart Offerings / Deliverables: All three engagements are designed to provide basics to enable companies to jumpstart these initiatives.

- Technical training workshop** - This 2 day overview and hands-on training class is designed for technical developers and will lead them through guided exercises to create and publish critical reports and output.
- Functional / Business Analyst workshop** - Also a 2 day class, It will provide the foundations and exercises for Business Analysts and Functional reporting specialists to produce critical output using the BI Publisher tools.
- Reporting Roadmap** - This engagement, led by experienced functional consultants with business backgrounds, will analyze all reporting inputs and outputs, reporting tools, and publishing requirements. The deliverable will be a roadmap to address the conversion to BI Publisher in order to save money and streamline your publishing and reporting efforts.
