## Oracle Financials Health Check

As companies attempt to navigate the changing terrain of Oracle Applications, they sometimes find that they are in need of a tune up. **O2 Works LLC** has some of the most experienced, hands-on consultants in the industry and we have been working with the Oracle Applications since some of the first releases. Technology, business, and Oracle Applications have changed. Many companies find themselves losing ground on their efficiency in using the Oracle Applications. **O2 Works** is offering an Oracle Financials Health Check to help jumpstart proficiency in using the Financial Applications. From best practice process recommendations to quick hit reporting tips, we employ a facilitated “Top 10” approach to identifying those items that can help you get the most out of your Oracle ERP investment.

**Description of Service:** Depending upon the size and complexity of your application footprint, **O2 Works** will deploy a team consisting of one to two Financial Experts and a technical expert. We will conduct interviews over a 2 –3 day timeframe and identify challenging areas where improvements can be made. It is expected that the evaluation will be completed within one week’s time and findings and recommendations delivered the following week. We do not waste client’s time with superfluous process mapping exercises and focus on high value fixes.

**Deliverables:** Engagement deliverables for the Oracle Financials Health Check:

- An Impact Analysis report detailing our findings covering:
  - Module / problem area
  - Description of the problem / opportunity
  - Effort level of remediation (low, medium, high)
  - Best approach to fixing the problem
  - Classification of benefit
  - Recommended resolution of quick hit items
- Strategic briefing meeting / presentation for key personnel and end-users

Our goal is to help you gain efficiency and productivity in using your Oracle Financial application and get the most out of your Oracle E-Business Suite investment.
